

Saviynt Virtual Fireside Chat

MAY 6, 2026 | 1:00 PM ET

Stephens is hosting a conference call for institutional investors with Saviynt, a leading provider of identity security solutions and a recognized leader in Identity Governance & Administration (IGA). This interactive discussion will explore key trends shaping the identity security landscape, including growth drivers and competitive dynamics, as well as Saviynt's evolution toward a unified identity security platform. The conversation will also cover areas of differentiation, innovation priorities, and the emerging opportunity in machine and agentic identity security.

Participants

Paul Zolfaghari, President

As President, Paul is responsible for developing Saviynt's corporate strategy while directly overseeing all departments and operations of the company. Paul is a seasoned executive with significant experience in the business-to-business software and SaaS industries. From 2017 to 2022, Paul was a Managing Director at private equity firm Carrick Capital Partners where he was a member of the Investment Committee and Chairman of the Operations Committee. While at Carrick, Paul co-led the investment in Saviynt, and served on its Board from 2017 until 2022. From 2012 to 2016 Paul was President of MicroStrategy (Nasdaq: MSTR) the global enterprise analytics company.

Conference call date and time subject to change. To join the call or to obtain more information, please contact your Stephens sales representative.

Topics of Discussion

- Saviynt's evolution and positioning as it expands from an Identity Governance & Administration (IGA) leader to a broader identity security platform provider
- The current state of the identity security market, including key demand drivers, the shift toward unified platforms, and competitive dynamics
- Key areas of differentiation and competitive advantage within the identity security landscape
- The emerging opportunity in machine and agentic identity security, including Saviynt's perspective, strategy, and its recently launched Identity Security for AI solution
