## About 908 Devices

**908 Devices (MASS)** offers an innovative suite of purpose-built handheld and desktop mass spectrometry devices for the point-of-need. Leveraging proprietary platform technology, MASS offers Mass Spec devices that are significantly smaller and more accessible than conventional laboratory instruments. These devices are used at the point-of-need to interrogate unknown and invisible materials and provide quick, actionable answers to address some of the most critical problems in life sciences research, bioprocessing, industrial biotech, forensics and adjacent markets.
